Central Valley Regional Water Board Boardroom

11020 Sun Center Drive #200 Rancho Cordova, CA 95670

Thursday, April 17, 2008

# SALINITY STAKEHOLDER WORKSHOPS

## APRIL 10 & 17, 2008

### TULARE & SACRAMENTO, CALIFORNIA

Salinity management is a major water challenge for the Central Valley. Lack of adequate salinity management will increasingly impact all communities and businesses in the Central Valley and throughout California. The challenge to control these impacts must involve agencies, industries, and organizations at all levels within and outside the Central Valley Water Board's jurisdictional area. The Water Board is developing regulations for the implementation of a region-wide salinity management through its Water Quality Control Plan. The Water Board recognizes that implementation of the Plan may require both regulatory and non-regulatory implementation strategies to protect the Central Valley's surface and ground water supplies and resources from the negative impacts of salinity. They invite you to join the effort. These workshops are designed to both inform and to explore solutions for managing salinity.

The program will provide a high level introduction and overview to all attendees, allowing elected officials to receive a summary introduction from 9:00 to 10:00 and for other participants to learn more about salt to how to help insure economic growth in the Central Valley.

- Introduction, overview and executive briefing 9:00 to 10:00 am
- Workshop program continues 10:00 am to 3:00 pm and features brief updates on recent research, policy options and short and long term alternatives with active group review.

## FUNDING PROVIDED BY:

## OUTREACH SPONSORS:

**SPACE IS LIMITED.  
PLEASE RSVP BY 4/4/08.**

The program is sponsored by the Water Boards. Program and outreach assistance by Central Valley RWQCB, CV Salinity Policy Group Executive and Education and Outreach Committees, California State University Fresno, Association of California Water Agencies, California Farm Bureau, California Association of Sanitation Agencies, American Society of Civil Engineers, California Sections, and California League of Cities.
